software for system situational awareness and representation in a communication and data link control system; telecommunications channel amplifiers; frequency filters for use in telecommunications; computer hardware for electronic key information processing, namely, the processing of information related to electronic encryption and other security technologies; radio frequency limiters; harmonic generators; satellite transponders; transponder controllers; secure communications systems consisting of digital processors, modulators, antennas, transmitters, receivers, and encryption hardware and software for secure algorithm processing devices for use with airborne, satellite, ground and sea-based information collection, transmission and analysis; communications systems consisting of high data rate microwave communications links and computer hardware; communications systems consisting of telephonic and high data rate microwave radio components, digital processors, computer hardware, software containing algorithms for use in processing secure communications and software for the secure broadcast and/or receipt of communications and information or data; on-board satellite equipment providing subsystem capabilities, namely, electronic modules and circuit cards for digital solid-state recording of electronic data, video signal processing, communications signal processing and translation; microwave devices, equipment, products and components, namely, frequency transmitters, frequency converters, frequency synthesizers, frequency modulators, frequency filters, frequency power amplifiers, passive components, mechanical switches, wireless frequency monitors; radio navigation equipment comprised of recording transmission and receiving microwave equipment, namely, microprocessors, electronic displays, digital storage devices, radio transmitters and receivers, providing the following capabilities; navigation, vehicle command and control, vehicle indications and warning, data and telemetry recording; surveillance equipment and devices, namely, ISR (Intelligence Surveillance Reconnaissance) subsystems which use computer hardware and software to provide a sampling of the electromagnetic spectrum in prescribed frequencies to extract information content available for analysis, for use in military and civilian aircraft; electronic sensors that provide in real time the ability to collect electronic data and information; electronic computer hardware and software that allow for the collection, monitoring, analysis, storage, and presentation of medical images; hardware that allows for the interfacing of analog or digital signals into the existing PSTN (Public Switch Telephone Network) or

global information network and create the ability to take those same signals into a mobile communications system; telephonic computer hardware that allows for creation of a wireless last mile, namely, wireless radio connections between a central source and destination with the telephony and data system having fixed site or mobile operational capability; communications terminals which consist of computer hardware that provides for the creation and connection of multimedia communication signals including analog, voice, data, and video and allow signals to be connected to other communications terminals or other network nodes; Radio and television transmission systems comprising transmitters, monitors, signal mixers, audio and video signal encoders and decoders and editing equipment, namely, signal processors; transmitters and receivers for satellite communications; computer operated network systems comprising computer hardware and software for transmitting data between computers connected in a network and for managing the computers and the transmission of the data on said network; computer information systems comprising computers and software for processing data, word processing and displaying of data; avionics systems comprising digital maps, fiber-optic and wire data busses, memory devices, instrumentation for displaying, storing, processing, and retrieving weather, tactical, strategic and secure data, aircraft cockpit controls and data displays; phased array antennas; global positioning equipment comprising data processors and displays; Computer software and computer hardware for use in air traffic control communications systems for displaying transporting, transmitting voice, data and images, controlling, switching, routing, and receiving air traffic information; computers and computer software for converting images into data, and for analyzing, displaying and printing the data in the field of two and three-dimensional image extraction, manipulation, display, and geographic registration; secure computer operated systems consisting of computer hardware and computer software, and encrypted databases, all used for ensuring and controlling the security and access of a computer network and the information contained therein namely, tracking air traffic and transmitting encrypted messages to pilots data base management, file transfer, and for connecting computers and data bases in a network and for air traffic circulation management; airline management system comprising computers and software for database management and for exchanging aircraft and aircraft operations information; Television signal analysis processors, namely, electronic display panels for

displaying signals, signal evaluation terminals primarily comprised of customized signal analysis hardware with integrated displays and software analysis components running on industry standard computers and monitors for evaluating the quality of analog and digital signals, media analysis servers for verifying the quality of digital media content, signal interface modules, handheld signal analyzers, optical signal analyzers, circuit testers for monitoring broadcast signals, and video monitoring tools, namely, software based video monitoring tools, namely, computer software for monitoring and logging the loudness of media content; timing reference generators, namely, time reference signal generators for broadcast system timing signal and test signal generation; hardware and computer software for television production, post production and broadcast, namely, demodulators, digital signage, namely, dynamic electronic displays and networking computer servers and computer software for managing and controlling dynamic electronic displays, distribution amplifiers, audio/video editors, namely, computer workstations equipped with computer software for editing audio and video program material, computer hardware and computer software sold as a unit for generating characters and graphics, computer software for generating visual effects, computer hardware and computer software sold as a unit for generating and inserting on-air branding, emergency alert modules, namely, computerized electronic modules and associated computer software for implementing the broadcasting of public emergency alert messages, fiber optic signal transports, electronic master control switchers for audio and video signals, audio and video signal compressors and audio and video signal decompressors, multiplexers and de-multiplexers, multiviewers, broadcast computer network monitoring and control application software, electronic network control panels, audio, video and data receivers and decoders, electronic routing switchers for audio and video signals, video servers, NTP timing modules comprised primarily of computer hardware and computer software for carrying out NTP timing, signal timing clocks, signal transport modules, audio/video sync and timing managers primarily comprised of high precision clock generation circuitry for synchronization of audio with video, computer software for creating and displaying timecode markers, up/down signal frequency converters, signal format cross converters, all for use in the media and entertainment industry; broadcast operations software for advertising, sales, traffic and billing, automation, digital asset management, programming and rights management, namely, computer software

for managing, monitoring and automating the buying, selling, scheduling, research, inventory management, production tracking and accounting processes for advertising, and general content for the media and entertainment industry; computer software for controlling and monitoring switching systems for television and radio signals; computer software for managing, monitoring and automating the creation, movement, location, archiving, retrieval and use of digital media assets; business process management and messaging software, for managing and controlling human and automated workflows and multisystem communications for use in the media and entertainment industry; network management centers primarily comprised of mobile and portable radios and also containing electrical base station controllers, electrical communication controllers and electrical network controllers; mobile and non-mobile two-way communications radios; portable two-way communications radios; radio network gateways comprising computers, computer switches and associated computer software for voice and data communications; Internet protocol-based networks comprising computer hardware and computer software for interoperable communications; telecommunications equipment, namely, trunked radio communication systems for public service and industrial applications comprised of portable communications radios, electrical base station controllers, electrical communication controllers and circuit switches; control equipment for two-way mobile and two-way fixed radios, namely, base station equipment for fixed and mobile networking and communications, cell sites primarily comprised of electronic hardware, computer software, antennae, and base stations, control stations primarily comprised of, radio hardware and associated computer software, desktop control stations primarily comprised of radios, radio hardware and associated computer software, dispatch and console hardware, namely, dispatch consoles and software for carrying out emergency and nonemergency communications and carrying out command and control of public safety personnel and assets, site management computer hardware and software for managing communications radios and base stations, and network monitoring computer hardware and software for monitoring communications radios and base stations; radio data communications systems primarily comprised of mobile communications radios and also containing non-mobile communications radios, portable communications radios, base station controllers, communication controllers, and network controllers; communications radio network gateways comprised primarily of computers, computer switches and

associated computer software for providing a gateway between networks; space deployable reflectors for satellite communications; computers and computer software for processing geographic elevation data representing the elevations of locations on the earth to generate, display and print three-dimensional geographically registered representations of those locations; computers and computer software for managing, cataloging and retrieving geospatial imagery, imagery derived products and other intelligence products, through the synchronization of data catalogs across disparate storage locations; computers and computer software for managing, processing, exploiting and disseminating motion imagery intelligence; computers and computer software for managing, processing, exploiting and disseminating flight planning presentations to general aviation pilots and air traffic controllers; networking communications radios; shipboard communication terminals primarily comprised of antennae, pedestals, positioners, modems, up converters, down converters, amplifiers and user interfaces; ground communication terminals primarily comprised of antennae, pedestals, positioners, modems, up converters, down converters, amplifiers and user interfaces; computer information systems comprised mainly of computers and computer software for processing data, word processing and displaying of data in the fields of census information systems, healthcare information systems, intelligent electrical power distribution systems, weather reporting and forecasting systems and environmental reporting and forecasting systems; avionics equipment, namely, video signal compressor and decompressors, power supplies, mounting racks specially adapted for mounting and interconnecting electronic apparatus, airborne signal processors for network interoperability and for targeting, of weapons secure network switches, computer software in the nature of networking protocols for facilitating the exchange of electronic messages and data, radio frequency (RF) data links for weapons, UHF/VHF wireless data links, beam former electronics primarily consisting of power amplifiers and also containing low noise amplifiers, phase shifters, time delay units, transmit and receive switches, array dividers, array combiners, frequency up-converters, frequency down-converters, array controllers and array power supplies and control equipment, antenna control units, attitude and heading reference units, transmit/receive control units, antenna position controllers and frequency band select switches; air traffic control communications systems consisting of computer hardware and computer software for displaying,

transmitting, controlling, switching, routing, and receiving weather data; two-way radios for communication of voice, data, images and video for use by military and other government agencies; two-way communications radios, namely, voice and data communications radios operable across multiple frequency bands for enabling public safety officials and first responders such as law enforcement agencies, paramedics, firefighters and military personnel to communicate interoperably with one another even though their respective pre-existing communications infrastructures might otherwise be mutually incompatible; trunked radio communication systems for public service and industrial applications, namely, cellular base stations and mobile radio base stations for two-way mobile and fixed communications radios; loudspeakers for mobile two-way communications radios; loudspeakers for non-mobile two-way communications radios; battery chargers for two-way communications radios; Internet protocol-based communication networks comprised primarily of computer hardware and computer software for implementing interoperable communications; cryptographic modules namely, electronic modules with embedded firmware for data encryption; encryption engines; radio frequency wireless communications adapters, namely, network interface cards; software for operating radio frequency wireless network interface cards; communications software for connecting radio frequency wireless network interface cards to a local area communications network; radio network gateways comprised primarily of computers, computer switches and computer software in the field of voice and data communications; computer software for use in the field of air traffic control, namely, for the supervision, maintenance, administration, troubleshooting and configuration of computer software for monitoring the performance of air traffic control systems, mapping definition, uploading software updates and releases, access control, user definition, recovery and diagnostic reporting. in the name of L3Harris Technologies, Inc., a Delaware corporation, 1025 West NASA Boulevard, Melbourne, Florida, 32919, United States of America. performing cell-based assays by means of luminescence and fluorescence detection; apparatus and instruments for research in laboratories and for analysis of microtiter plate based assays, namely, instruments comprising an imaging detector, a telecentric lens, illumination light source, emission and excitation filters and sample plate handling mechanics to automatically position sample plates in a well-defined position for imaging of the sample; computer workstation comprised of downloadable computer software for controlling instruments, measuring protocols, defining sample plates, measurement technologies and optical components, and storing measurement data in a database and lets the user investigate the data and export it for further off-line analysis; laboratory apparatus, namely, cellular luminescence and fluorescence workstations consisting primarily of micro-titer plate readers, automated liquid-flow and liquid-level control machines and instruments, computers and downloadable data analysis and reporting software for analyzing and reporting data obtained from the workstation; laboratory robots; computer hardware; downloadable computer software for use primarily in the field of pharmaceutical research, for analyzing fluorescence detection data; downloadable computer software for controlling analytical laboratory instruments, and for managing and reporting data generated by such instruments; laboratory apparatus and equipment, namely, an imaging system comprising downloadable computer software, computer hardware, monitors, cameras, optical couplers, optical polarizers, light filters and polarizing compensators for the measurement and analysis of stress, polarization, optical retardance, birefringence, and related properties of both macroscopic and microscopic samples; downloadable computer software for research purposes for viewing, measuring, and analyzing digital images, including color images and multispectral images, sold alone or as a system with computer hardware; laboratory equipment, namely, digital imaging systems comprising an illuminator, a digital camera, optical interference filters and a tunable filter, used for fluorescence optical imaging of samples, and downloadable computer software for use in operating the digital imaging system, or interpreting the images obtained thereby, computers, and adaptors for lenses and microscopes, all of the foregoing sold separately or as a unit for fluorescence optical imaging; laboratory equipment, namely, digital imaging systems comprising a digital camera and a tunable filter, used with microscopes or lenses to obtain images of microscopic and macroscopic samples or of natural scenes, and downloadable computer software for use in

operating the digital imaging system, controlling the microscopes or lenses, or interpreting the images obtained thereby, and adaptors for microscopes and lenses, all of the foregoing sold separately or as a unit for multispectral optical imaging; automatic laboratory equipment, namely, a robotic workstation consisting of robotic arms used for transferring, dispensing and diluting liquids in drug screening applications; laboratory apparatus and equipment, namely, automated light microscope system consisting primarily of a light microscope, computer hardware and downloadable computer software for optical imaging; downloadable computer software for application and database integration; downloadable computer software for creating searchable databases of information and data; downloadable computer software for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information; downloadable computer software that provides real-time, integrated business management intelligence by combining information from various databases and presenting it in an easy-to-understand user interface; downloadable computer software to automate data warehousing; downloadable computer software for providing and searching information in the field of chemistry, namely, information on chemicals, chemical structures, drawings, and properties, and related molecules; downloadable computer software for providing chemical supply information, namely, information about chemical supplier catalogs, chemical suppliers, chemical availability, chemical safety, chemical handling, and chemical procurement; downloadable computer programs for use in drawing biological pathways and instruction manuals sold therewith as a unit; downloadable computer programs for use in searching information and information integration in the fields of biology and chemistry, and instruction manuals sold therewith as a unit; downloadable computer software for creating searchable databases of chemical reaction data; electronic databases in the field of biological and chemical research information recorded on computer media; downloadable mobile applications for creating, editing, transmitting, storing, collaborating, importing, and organizing data and information in the field of chemistry; downloadable mobile applications for creation, edit, transmission, storage, collaboration, importation, organization of data and information; downloadable computer application software and downloadable software systems for the collection, editing, organizing, modifying, transmission, storage and sharing of data and information related to chemical research and analysis; downloadable computer programs for use

in chemical structure drawing, molecular modeling and analysis, and searching information and information integration in the field of chemistry; downloadable computer software for creating searchable databases of information and data, wherein the information and data is contained within documents and wherein the documents do not relate to customer care, financial management, billing management or ophthalmologic data; downloadable computer software for the collection, editing, organizing, modifying, book marking, transmission, storage and sharing of data and information, wherein the data and information is contained within documents and wherein the documents do not relate to customer care, financial management, billing management or ophthalmologic data; downloadable computer software that provides real-time, integrated business management intelligence by combining information from various databases and presenting it in an easy-to-understand user interface, wherein the database content is documents and wherein the documents do not relate to customer care, financial management, billing management or ophthalmologic data; downloadable computer software that provides web-based access to applications and services through a web operating system or internet portal; downloadable computer software to automate data warehousing of documents, wherein the documents do not relate to customer care, financial management, billing management or ophthalmologic data; BIOS, being a downloadable basic input/output system computer program; downloadable computer search engine software; scientific instruments and devices for the testing, screening and analysis of pharmaceuticals, for chemical screening and analysis of biological substances and for nucleic acid characterization; computer hardware and peripheral devices used in the development, testing, screening and analysis of pharmaceuticals, for chemical screening and analysis, for the development, testing, screening and analysis of biological substances and for nucleic acid characterization; downloadable computer software for operating and controlling automatic laboratory equipment used for transferring, dispensing and diluting liquids in drug screening applications; downloadable computer programs for use in robot manipulation; laboratory furniture, namely, modular tables that can be interconnected to form a variety of system configurations for use in laboratory automation; downloadable computer software for operating robots containing microplate readers, washers, and incubators for pharmaceutical laboratory use; semiconductor that performs chemical and biological material analysis; microfluidic devices and instruments used for the testing, screening and

analysis of pharmaceuticals, for the testing, screening and analysis of biological substances and for nucleic acid characterization; laboratory equipment, namely, robot manipulators, laboratory consumable dispensers, laboratory sample conditioners being laboratory equipment, namely, incubators, stirrers, mixers, dispensers, and aspirators; laboratory measurement devices for measuring absorbency, weight and volume of pharmaceutical samples; laboratory pipettes; pipette tips, glassware and filters for use in laboratories; automatic laboratory equipment, namely, a robotic workstation consisting of robotic arms used for transferring, dispensing and diluting liquids in drug screening applications comprising automated pipettors configured to dispense fluids into and remove fluid from microtiter plates; computer-controlled laboratory robots; downloadable computer software for controlling and managing patient medical information; downloadable scientific and medical data via the internet; downloadable computer software for medical services, namely, medical diagnostic software and medical testing software for medical laboratory data management, patient record keeping, tracking, recording, monitoring, analyzing and reporting medical data obtained related to newborn screenings; downloadable computer software used by research scientists to acquire, manage and analyze molecular biology and life science data and information; downloadable computer software, namely, software for use in database management in the field of bioinformatics; optical imaging devices, namely, a fluorescence imaging system comprised of computer imaging hardware, a computer, monitor and downloadable imaging software for use therewith, not for medical use; electronic light imaging system for detecting very low levels of light, namely, a CCD camera and light-tight imaging chamber for scientific and engineering use; downloadable computer software used to acquire, store, archive, retrieve, track, coordinate and analyze internal light images for medical research and scientific purposes; downloadable computer software for scientific analysis of genetic sequences; downloadable software in the field of DNA research for acquisition, analysis and processing of scientific, diagnostic, pharmaceutical, biological, biotechnological and veterinary data; laboratory robots for moving microplates between storage racks and laboratory equipment, namely, laboratory readers, washers, dispensers and incubators; downloadable computer software for controlling robots that move microplates between storage racks and laboratory equipment, namely, laboratory readers, washers, dispensers and incubators; user manuals sold as a unit with the

foregoing goods; All the foregoing excluding any goods that feature or utilize public key encryption; Computer software platforms, downloadable, for scientific analysis in the field of nucleic acid analysis; Computer software platforms, recorded, for scientific analysis in the field of nucleic acid analysis; Laboratory apparatus and computer systems for use in protein purification; Laboratory apparatus and instruments for extracting DNA; Laboratory apparatus and instruments for extracting nucleic acid; Laboratory chemical reactors; Laboratory devices for detecting genetic sequences; Laboratory equipment and supplies, namely, test tubes; Magnetic separators for scientific use; Medical laboratory research instruments for DNA analysis; Medical laboratory research instruments for nucleic acid isolation; Research laboratory analyzers for measuring, testing and analyzing blood and other bodily fluids; Scientific instrumentation for measuring proteins; Scientific instruments, namely, electronic analyzers for testing and analyzing chemical and biological substances for the presence, absence, or quantity of biologics; Diagnostic apparatus for testing food; Scientific instruments used in laboratory sample preparation for magnetic particle separation, namely, magnetic beads, magnetic particle concentrators, magnetic particle analyzers, magnetic particle separators; scientific instruments used in laboratory for preparation of samples using magnetic particles for chemical, biological or physical analysis or purification, namely, functional magnetic beads, namely, chemically activated beads and beads modified with specific antibodies, magnetic purification beads, buffer-solutions, solvents, suspension agents, sample preparation kits and cartridges, laboratory apparatuses and instruments for preparation of samples using magnetic beads for chemical, biological or physical analysis or purification, namely, functional magnetic beads for binding analytes for chemical, biological or physical analysis, namely, chemically activated beads and beads modified with specific antibodies, magnetic purification beads for chemical, biological or physical purification of analytes, buffer-solutions, solvents, suspension agents, sample preparation kits; Testing kits comprising a microarray and DNA array for chromosome analysis for medical purposes or medical research purposes; chromosome testing kits comprising a microarray for use in in vitro fertilization (IVF) clinics or medical research laboratories; kits comprising a microarray for testing chromosome content for use in assisted reproductive technologies for medical purposes or medical research purposes; Laboratory apparatus and instruments for homogenizing, mixing, disrupting, and shaking samples; homogenizers, high-shear homogenizers,

hand-held homogenizers, high-power homogenizers, programmable homogenizers, industrial homogenizers, multi-sample homogenizers, automated/robotic homogenizers, ultrasonic cell disrupters, bead-mill homogenizers, tissue grinders, glass homogenizers, parts and accessories, namely, probes, tubes, and beads for use with laboratory apparatus and instruments, homogenizer probes/tips, homogenizer containers/vessels, homogenizer sample tubes, homogenizer motor-stand assemblies, homogenizer sealed-chamber assemblies, homogenizer beads, homogenizer quick-connect couplings, homogenizer external speed controls, and homogenizer vessel-restraint disks; Laboratory apparatus and instruments for use with cell culture applications for cell-based assays; Laboratory apparatus and instruments for performing chromogenic assays; Laboratory apparatus and instruments for identifying, managing, tracking and analyzing cell cultures; apparatus and instrument for scientific research used to acquire cell data; Apparatus and instrument for scientific research used to acquire cell data, namely, automated cell counter, bright field cell counter, fluorescence cell counter, cell imaging system that quantifies cells in samples, cell analyzer, cytometer, microscope, as well as parts designed to be used therewith; Measuring devices for measuring pressure, temperature, chemical compound concentrations and optical signals, such as fluorescence and chemiluminescence for diagnostic sample testing, not for medical use; sensors and detectors for testing UV fluorescence and chemiluminescence for diagnostic sample testing, not for medical use; laboratory apparatus for recording, transmission or reproduction of diagnostic data, sound or images, namely, cameras, microscopes, photometers, microplate photometers, ELISA (enzyme-linked immunosorbent assay) readers, photomultipliers and microplate readers; laboratory software for recording, transmitting and reproducing diagnostic data, sound and images; biochips for research or scientific purposes; plates having multi-well arrays that can be used in chemical analysis, biological analysis or patterning for scientific, laboratory or medical research use; Devices for measuring chemical levels, in particular antigen levels, in water or water-based solutions for use in diagnostic sample testing, for detecting allergies and not for medical purposes, all of the foregoing limited to devices for examining a product of which the smallest carrier unit comprises no more than one kind of diagnostic preparation or substance, other than the aforesaid goods for use with blood reserves and medical transfusion products, and limited to use in immunofluorescence-based diagnostics using

tissues and transfected eukaryotic cells as substrates; Collections of DNA and gene sequences for research and reference purposes provided as DNA microarrays and DNA chips; Imaging apparatus and software for detecting and studying tumors for scientific research and laboratory purposes; imaging apparatus and software for detecting and studying in vivo disease models for scientific research and laboratory purposes; imaging apparatus for use in the field of assessment of bioengineered tissues and organs for scientific research and laboratory purposes; electronic equipment for scientific research, namely, ultrasound scanners, ultrasound imaging devices, and light-tight imaging chamber for use with a CCD camera, other than for medical or veterinary purposes; Instruments for testing, processing or detecting biological samples for laboratory purposes, namely, an automatic analytical device for quantifying levels of 1,25-dihydroxyvitamin D; computer software for use in analyzing and managing biological data; Microplate readers; measuring devices, namely, fluorometers; downloadable and recorded computer software for use in medical decision support systems; downloadable and recorded computer software for calculation and assessment of health risks and risks for genetic disorders; Scientific, research, navigation, surveying, photographic, cinematographic, audiovisual, optical, weighing, measuring, signalling, detecting, testing, inspecting, life-saving and teaching apparatus and instruments; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling the distribution or use of electricity; apparatus and instruments for recording, transmitting, reproducing or processing sound, images or data; recorded and downloadable media, computer software, blank digital or analogue recording and storage media; mechanisms for coin-operated apparatus; cash registers, calculating devices; computers and computer peripheral devices; diving suits, divers' masks, ear plugs for divers, nose clips for divers and swimmers, gloves for divers, breathing apparatus for underwater swimming; fire-extinguishing apparatus. in the name of REVVITY, INC., a Massachusetts corporation 940 Winter Street, Waltham, Massachusetts 02451, United States of America.
